150L

217L

A stable liquid suspension of spores and vegetative micro organisms capable of digesting complex proteins, starches, fats, cellulose and vegetable gums. Bio Treat contains strains of bacteria which degrade tissue paper, fats, oils and grease at an accelerated rate and can be used in Municipal waste water treatment works, oxidation ponds, bio filters, lagoons, septic tanks, Pit latrines, grease and fat traps.

FEATURES OF BIO-TREAT

- A select blend of highly active bacterial cultures and fungus.
- Cultures grow in either the presence or absence of air.
- Good stability and long shelf life.
- Non-corrosive liquid, easy to handle.
- Can be used as supplied.
- Each batch is tested and standardized to ensure a high level of quality.
