

A powerful water based cleaner for hydrocarbons and greases based on natural citrus oils. Oil Gone WB is an environmentally friendly product, used for the rapid removal of heavy oils and greases on a wide range of floors and surfaces.

USING OIL GONE

Oil Gone WB should be used undiluted for heavy duty cleaning. Apply to the surface to be cleaned with sufficient agitation or scrubbing to remove the soiling. Oil Gone WB can be diluted as required for general cleaning. The waste product can then be washed to drain where regulations allow. 1 litre of Oil Gone WB will cover 3-5 square metres depending upon surface porosity.
